

GC9500 SERIES A.C. HYDRAULIC POWER SYSTEMS

The GC9500 Series ... Versatility, Flexibility, Performance

A COMPLETE, SELF-CONTAINED, MODULAR AC POWER SYSTEM

GC9500 Series, AC hydraulic power units offer you the ultimate in design, versatility and ordering flexibility. You can order them completely assembled -- with pump, motor, reservoir, filters and all required valving -- from Haldex Hydraulics or our distributors. Or, if you already have certain components available, you can order an assembled, partial unit, or just the individual component kits which enable you to create or modify a unit to meet your exact requirements. Individual component kits are available from our distributor stock.

The heart of a GC9500 power unit is a high quality, cast iron pump. The Pressure Balanced pumps offer superior performance -- up to 90% overall efficiency -- in high temperature and high duty-cycle applications. They are especially suitable for systems utilizing low viscosity fluids. The Two Stage, High/Low pumps

provide high speed positioning, and then maximum working pressure to complete the work in applications such as clamping mechanisms, crimping machines, and metal forming machines.

All assembly is done on a versatile reservoir cover which is then secured to the reservoir to complete the system. This eliminates assembly and service within the reservoir, long hose runs, and multiple connections. The pump is attached to the underside of the reservoir cover for ease of access, and being inside the reservoir, it provides quiet operation. All GC9500 systems and components are manufactured to the most rigid specifications, providing the highest quality and reliability. The following quality and design features are standard on all GC9500 power systems.

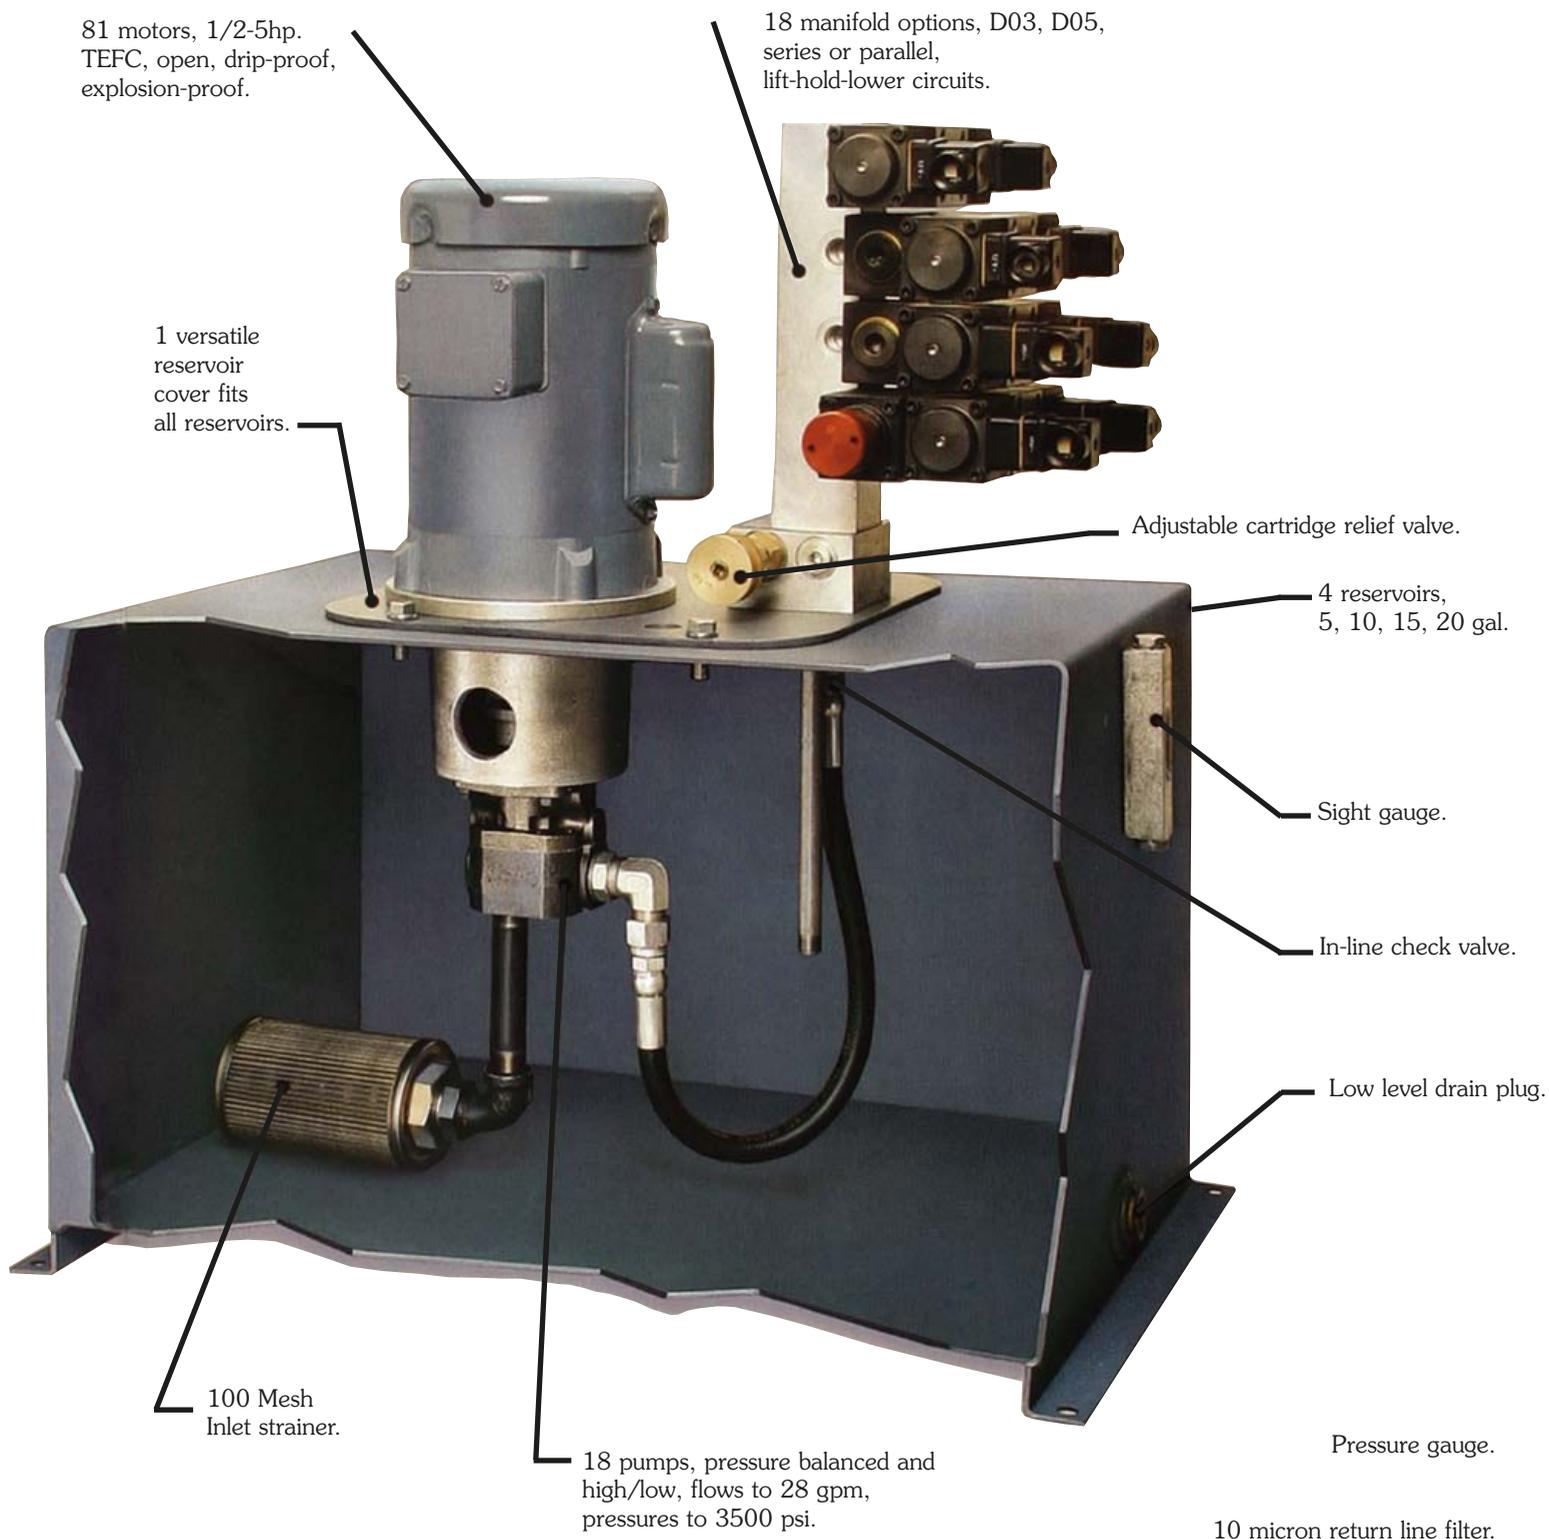

- Hardened and ground alloy-steel gears and shafts.
- High strength, fine grain, cast iron housings.
- DU[®] bearings.
- Filler screen.
- Sight gauge.
- Flexible coupling.

This catalog describes the GC9500 system in detail. It provides useful performance and necessary dimensional information along with an easy-to-follow ordering guide for complete systems or individual component kits.

If you have questions, or require technical assistance, please call us Toll Free: 800-572-7867.

GC9500 SERIES AC HYDRAULIC POWER SYSTEMS

SPECIFY THE POWER UNIT YOU NEED FROM A RANGE OF STANDARD OPTIONS

Pressure Balanced Pump Options

Pressure Balanced pumps are counterclockwise rotation and are constructed of heavy-duty cast iron with hardened steel gears and shafts. Volumetric efficiencies up to 99% are achieved through the use of floating pressure plates which maintain gear to sidewall clearances at elevated pressures. Internal pressure passages permit oil from the high pressure side to enter a precisely controlled seal area, loading the plate against the seal surface. This assures maintenance of a controlled contact force between the plates and gear sets. Tip clearance is also controlled precisely. Pressure Balanced pumps offered for the GC9500 power unit are shown below:

PRESSURE BALANCED PUMPS (Pump rotation is CCW)

Displacement	Flow 1800 RPM	Flow 3600 RPM	Max. Continuous Pressure	Max. Intermittent Pressure	Mounting Pattern	Shaft Dia.	Order Code	Pump Kit Part Number
.129 in.	1.0 GPM	2.0 GPM	3000 PSI	3500 PSI	4-Bolt	.56	A	1300427
.194 in.	1.5 GPM	3.0 GPM	3000 PSI	3500 PSI	4-Bolt	.56	B	1300428
.258 in.	2.0 GPM	4.0 GPM	3000 PSI	3500 PSI	4-Bolt	.56	C	1300429
.323 in.	2.5 GPM	5.0 GPM	3000 PSI	3500 PSI	4-Bolt	.56	D	1300430
.388 in.	3.0 GPM	6.0 GPM	3000 PSI	3300 PSI	4-Bolt	.56	E	1300431
.453 in.	3.5 GPM	7.0 GPM	2750 PSI	3025 PSI	4-Bolt	.56	F	1300432
.517 in.	4.0 GPM	8.0 GPM	2500 PSI	2750 PSI	4-Bolt	.56	G	1300433
.581 in.	4.5 GPM	9.0 GPM	2250 PSI	2475 PSI	4-Bolt	.56	H	1300527
.647 in.	5.0 GPM	10.0 GPM	2000 PSI	2200 PSI	4-Bolt	.56	I	1300528
.711 in.	5.5 GPM	11.0 GPM	1800 PSI	2000 PSI	4-Bolt	.56	J	1300529

When specifying a pressure balanced pump, be sure to also specify the correct inlet kit. The inlet kit contains the inlet filter and all plumbing to connect to the pump inlet, as well as an outlet fitting which connects the outlet hose. Select the outlet hose kit based on the outlet flow of the pump. Inlet port equals rear 1/2-14 NPTF; outlet port equals side 7/8-14 SAE.

To determine the performance of these Pressure Balanced pumps with different horsepower motors, refer to the performance chart on Page 6. Determine the flow required (GPM) then follow the chart to the right to determine the pressure capability at a given horsepower.

Two Stage, High/Low Pump Options

Two Stage, High/Low pumps are two-volume, external gear pumps designed for use at elevated pressures. They provide high speed positioning, and then maximum working pressure to complete the work. These rugged pumps feature heavy-duty, cast iron construction, long-life needle bearings and an integral unloading valve. Two Stage, High/Low pumps offered for the GC9500 power unit are shown below:

TWO STAGE HIGH/LOW PUMPS (Pump rotation is CW)

Combined Sections Nominal Flow 1800 RPM	Combined Sections Nominal Flow 3600 RPM	Low Pressure Gear Displacement	High Pressure Gear Displacement	Max. PSI	Unload Adj. Range (PSI)*	Mounting Pattern	Shaft Dia.	Order Code	Pump Kit Part Number
GC SERIES TWO STAGE HIGH/LOW PUMPS

8.0	16	.776 in.	.259 in.	3000 PSI	400-900	4-Bolt	.50	P**	1300487
D SERIES TWO STAGE HIGH/LOW PUMPS†									
11.0	22	.930 in.	.465 in.	3000 PSI	400-700	2-Bolt A	.62	Q	1300488
14.0	28	1.395 in.	.465 in.	3000 PSI	400-700	2-Bolt A	.62	R	1300489

* All pumps factory preset at 650 PSI: For settings outside the range shown, consult factory.

** 1" Inlet tube

† For 1800 RPM operation only.

When specifying a Two Stage High/Low pump, be sure to also specify the correct inlet kit. The inlet kit contains the inlet filter and all plumbing to connect to the pump inlet, as well as an outlet fitting which connects the outlet hose. Select the outlet hose kit based on the outlet flow of the pump.

To determine the performance of these Two Stage, High/Low pumps with different horsepower motors, refer to the performance chart on Page 6. Determine the flow required (GPM), then follow the chart to the right to determine the pressure capability at a given horsepower.

A.C. Motor Options

The GC9500 can incorporate virtually any NEMA-C face motor up to 5 horsepower.† The motor assembles easily to a versatile pump/motor adapter which also accepts the pump mounting flange. The pump and motor shafts are coupled by a durable flexible coupling to ensure concentricity for long pump and motor life. Only two pump/motor adapters are necessary to handle the wide variety of pump/motor combinations offered in the GC9500 system. The correct coupling is determined by the shaft diameters of the

motor and pump being used. (All motors except those asterisked in “How to Order” section have .62” dia. shafts.) Haldex and their distributors offer a wide selection of A.C. motors which can be specified into a completely assembled GC-9500, or ordered as kits. Performance of our pumps with motor horsepower ranges are shown below.

† Frames sizes 56, 143T, 145T, 182, 184 and any other with an AJ dimension of 5.88 inches.

PUMP CONTINUOUS PRESSURE RATINGS AT SPECIFIC MOTOR HP's

	5.5	130	200	270	410	540	820	1370	J	1300529
GC Series Two Stage	2.5	1500	3000	--	--	--	--	--	K	1300483
	3.5	1500	3000	--	--	--	--	--	L	1300484
	4.5	--	400	500	1500	2000	3000	--	M	1300485
	5.5	--	400	500	1500	2000	3000	--	N	1300356
	6.5	--	400	500	1500	2000	3000	--	O	1300486
D Series Two Stage	8.0	--	--	400	500	1500	2260	3000	P	1300487
	11.0	--	--	--	--	400	500	2080	Q	1300488
	14.0	--	--	--	--	400	500	2080	R	1300489

* To determine performance at 3600 RPM, multiply GPM by 2 and divide pressure by 2.

** For intermittent operation, the horsepower shown may be increased by a factor of 1.5 (eg. 1 GPM at 3000 PSI requires 2 hp for continuous operation). For intermittent operation, a 1.5 hp can be used (1.5 hp x 1.5 = 2.25 hp).

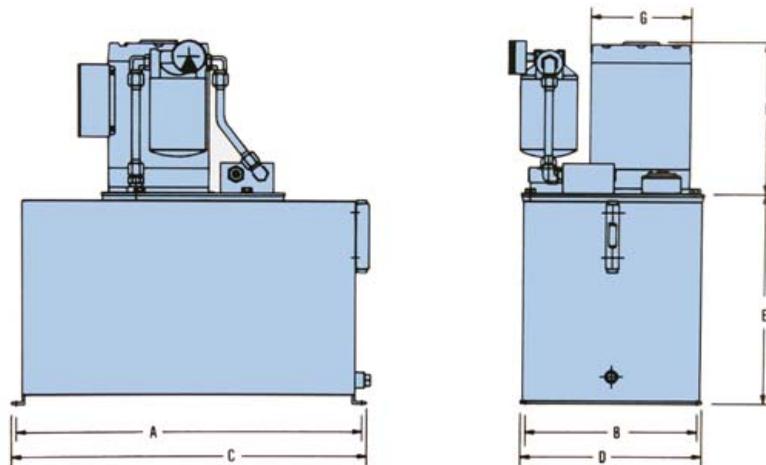

Reservoir Options

GC-9500 power systems are available with 5, 10, 15 and 20 gallon reservoirs. These reservoirs are made of cold-rolled steel and incorporate a sight gauge, a ferrous contaminant collector and an easily accessible drain plug. Each reservoir is gasketed for reliable sealing and the 10, 15 and 20 gallon units are raised off the floor to reduce vibration and enhance cooling. When selecting a reservoir, be sure to select the proper reservoir cover based on the flow rate of the selected pump. A key feature of the GC-9500 is that one reservoir cover will fit all 4 reservoir sizes. In addition, the GC-9500 can be ordered with a 10 micron spin-on type return line filter with 15 PSI bypass.

5 Hp	12.375"	7.875"

* All are max. dimensions. Contact factory for specific motor/reservoir dimensions.

Control Bases/Interfaces

CONTROL BASES/INTERFACES

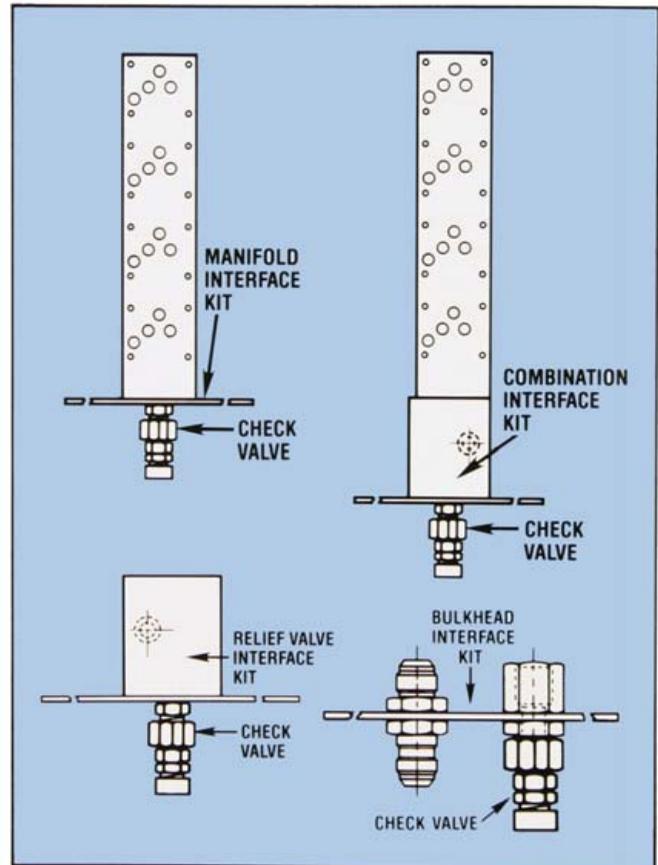

The GC-9500 can be specified with a wide variety of control bases. These modular bases are assembled right on the reservoir cover and range in complexity from simple bulkhead fittings to a four station manifold with relief valve block, pressure gauge, and in-line check valve. Relief valve settings range from 0 - 3600 PSI.

To specify a control base, first determine the output flow of the pump being used. Then determine the interface required based on that flow. An interface is the hardware used to mount the valve configuration required. If a relief valve and directional valves are required, a combination interface is used. If a relief valve only is required, a relief valve interface is used. *If directional valves only are required, a manifold interface is used. If no valving is required, a bulkhead interface is used.

Both combination and relief valve interfaces incorporate gauge ports to accept a 2.5" dry or glycerine-filled pressure gauge. All hardware required to assemble the interface is included in each individual kit.

NOTE: All of the above control base configurations can be specified with one of two in-line check valves which are sized based on pump output flow.

* The relief valve is not included in the interface.

INTERFACE KITS

	0-6 GPM		7-20 GPM	
	Order Code	Kit P/N	Order Code	Kit P/N
Combination Interface	1	1300508	2	1300507
Relief Valve Interface	8	1300722	3	130506
Manifold Interface	4	1300608	5	1300609
Bulkhead Interface	6	1300415	7	1300416

After determining the correct interface, complete the control base by selecting the manifold (if required) to accept the necessary directional control valves. Two basic manifolds are available in multiple stations with circuits in series or parallel. Manifolds with circuits in parallel are available in one to four station configurations and manifolds with circuits in series are available in two, three, and four section configurations. See page 11, Field V for kit part numbers.

NOTE: Solenoid release valve and orifice kits are no-charge items when ordering a lift-hold-lower manifold kit.

How to Order GC-9500 Power Systems

The modular GC 9500 system may be ordered four ways depending on your requirements. It may be ordered completely assembled, partially assembled and in complete or partial kits. When ordering a complete or partially assembled GC 9500 power systems, utilize the ordering code designations assigned to each component or sub-assembly shown below. When ordering a complete or partial set of kits, utilize the seven digit part number assigned to each kit.

Specify the GC 9500 system in two parts. First specify the power unit which will include the pump, motor type, motor code, adapter, coupling, inlet piping, outlet hose, reservoir, return line filter and reservoir cover. Then specify the control base and valving options. The control base includes the check valve, interface, relief valve, pressure gauge and manifold.

Explosion Proof Motors no longer available from stock.

VI Adapter Kit		
	Ordering Code	Kit P/N
For Four (4) Bolt Pump	A	1300384
For Two (2) Bolt A Pump	B	1300640

VIII Reservoir Kit		
	Ordering Code	Kit P/N
5 Gal. Capacity	A	1300387
10 Gal. Capacity	B	1300388
15 Gal. Capacity	C	1300389
20 Gal. Capacity	D	1300390

VII Coupling			
Motor Shaft Dia.	Pump Shaft Dia.	Ordering Code	Kit P/N
.62"	.50"	1	1300639
.62"	.56"	2	1300391
.62"	.62"	3	1300392
.88"	.50"	4	1300638
.88"	.56"	5	1300393
.88"	.62"	6	1300394

Some items are not available in small quantities, please contact factory for quotation.

IX Return Line Filter				
	0-6 GPM		7-20 GPM	
	Order Code	Kit P/N	Order Code	Kit P/N
10 Micron Filter With Manifold	1	1300684	4	1300686
10 Micron Filter No Manifold	2	1300685	5	1300687
No Filter	3	-	-	-

X Reservoir Cover Kit		
	Ordering Code	Kit P/N
For 0-6 GPM Manifold	1	1300530
For 7-20 GPM Manifold	2	1300531
For 0-6 GPM Bulkhead Fittings	3	1300610
For 7-20 GPM Bulkhead Fittings	4	1300611

CONTROL BASE

The control base can include the check valve, interface kit, relief valve, pressure gauge, manifolds and valving.

For Lift-Hold-Lower Manifold, specify manifold, solenoid release valve and fixed orifice together in field no. V (eg. VIA), see page 9.

CB **I** **II** **III** **IV** **V**
Check **Interface** **Relief** **Pressure** **Manifold**
Valve **Valve** **Gauge**

I Check Valve		
	Ordering Code	Kit P/N
0-6 GPM	A	1300413
7-20 GPM	B	1300414
No Check Valve	C	-

II Interface		
	Ordering Code	Kit P/N
Combination Interface 0-6 GPM	1	1300508
Combination Interface 7-20 GPM	2	1300507
Relief Valve Interface 0-6 GPM	8	1300722
Relief Valve Interface 7-20 GPM	3	1300506
Manifold Interface 0-6 GPM	4	1300608
Manifold Interface 7-20 GPM	5	1300609
Bulkhead Interface 0-6 GPM	6	1300415
Bulkhead Interface 7-20 GPM	7	1300416

III Adjustable Relief Valve		
	Ordering Code	Kit P/N
150-1200 PSI 0-6 GPM (Preset @ 900 PSI)	A	1300514
800-3500 PSI 0-6 GPM (Preset @ 3000 PSI)	B	1300515
150-1300 PSI 7-20 GPM (Preset @ 900 PSI)	C	1300516
500-3000 PSI 7-20 GPM (Preset @ 3000 PSI)	D	1300517
No Relief Valve	E	-

NOTE: Relief valve setting should not exceed pump maximum intermittent pressure rating as shown on pages 4-5.

IV Pressure Gauge			
	Pressure Range	Order Code	Kit P/N
Dry Pressure Gauge	0-1000 PSI	1	1300673
	0-3000 PSI	3	1300675
Glycerine Pressure Gauge	0-1000 PSI	2	1300679
	0-3000 PSI	4	1300681
No Gauge	--	5	--
ÜGauge Hardware (supply own gauge)		6	1300671

V Manifolds					
		D03 Parallel	D03 Series	D05 Parallel	D05 Series
1 Station	Order Code	H	-	O	-
	Kit P/N	1300360	-	1300364	-
2 Station	Order Code	I	L	P	S
	Kit P/N	1300361	1300613	1300365	1300524
3 Station	Order Code	J	M	Q	T
	Kit P/N	1300362	1300614	1300366	1300525
4 Station	Order Code	K	N	R	U
	Kit P/N	1300363	1300615	1300367	1300526

NOTE: Specify D03 valving for 0-6 GPM. Specify D05 valving for 7-20 GPM.

*V Lift-Hold-Lower Manifolds		
	Order Code	Kit P/N
0-6 GPM Fixed	V	1300659
7-20 GPM Fixed	W	1300657
0-6 GPM Variable	X	1300658
7-20 GPM Variable	Y	1300656

*For Lift-Hold-Lower Manifold, specify solenoid release valve and fixed orifice from tables on page 9. (Variable orifice is incorporated into manifold kit. It does not need to be specified.) Specify relief valve in Field III. Solenoid release valve and orifice are no-charge items when ordering a Lift-Hold-Lower Manifold kit.

PRODUCT RANGE

He Power Packs

12/24/48 VDC 0.8 - 3.5 kW and 0.75
- 3 kW AC modular power packs

Pressure Switches

5 - 350 bar connecting /
disconnecting

He Classic Power Packs

12/24/48 VDC modular
powerpacks in weatherproof boxes

W100 Hydraulic Pumps

0.5 - 2.0 cc/section, 227 bar

W300 Hydraulic Pumps

0.8 - 5.7 cc/section, 230 bar

W600 Hydraulic Pumps

4 - 12 cc/section, 276 bar

WM600 Hydraulic Motors

4 - 12 cc/section, 276 bar

W900 Hydraulic Pumps

5 - 31 cc/section, 276 bar

WM900 Hydraulic Motors

5 - 31 cc/section, 276 bar

WQ900 The Quiet Pump

5 - 27 cc/section, 230 bar

W1500 Hydraulic Pumps

19 - 50 cc/section, 276 bar

WM1500 Hydraulic Motors

19 - 50 cc/section, 276 bar

G25 Hydraulic Pumps

23 - 87 cc/section, 250 bar

GM25 Hydraulic Motors

23 - 87 cc/section, 250 bar

GPA Internal Gear Pumps

1.7 - 63 cc/section, 100 bar

GC Hydraulic Pumps/Fluid Motors

1.06 - 11.65 cc/section, 276 bar

II-Stage Hydraulic Pumps

4.2 - 22.8 cc/section, 276 bar

Rotary Flow Dividers

3.8 - 13.3 cc/section, 300 bar

D Hydraulic Pumps

3.8 - 22.9 cc/section, 207 bar

H Hydraulic Pumps

9.8 - 39.4 cc/section, 207 bar

G20/G30 Hydraulic Pumps

23 - 161 cc/section, 276 bar

GM20/GM30 Hydraulic Motors

23 - 161 cc/section, 276 bar

G20/G30 (LS) Hydraulic Pumps

23 - 161 cc/section, 276 bar

Transmission Pumps
