

FLSD (E)

Atmospheres containing explosive GAS

totally enclosed three-phase asynchronous motors

General information

CATEGORY 2
ZONE 1

A

Motors in accordance with the European Directive 94/9/CE.

Flameproof totally enclosed three-phase asynchronous motors, FLSD (E) series, according to IEC 60034, 60038, 60072, 60079-0 and 60079-1, EN 50019. FLSD series, from 0.55 to 400 kW.

Finish

Ex d(e) II B T4¹ protection mode.
Paint finish epoxy RAL 2004 (orange).
Protection of the flange and shaft end against atmospheric corrosion.

Protection

IP 55² standard version providing good sealing against projected liquid and dust in an industrial environment.

Mains supply

Standard construction suitable for the following supplies:
- 220/380 V Δ +10% -5% at 50 Hz,
- 230/400 V Δ +6% -10% at 50 Hz,
- 380 V Δ +10% -5% at 50 Hz,
- 400 V Δ +6% -10% at 50 Hz.

1. Other protections Ex d(e) II B, Ex d II C and Ex d(e) II C : consult us.

2. or IP 65 if 2GD application (gas and dust)

Description of the FLSD cast iron three-phase motors

II 2G Ex d II B T4¹

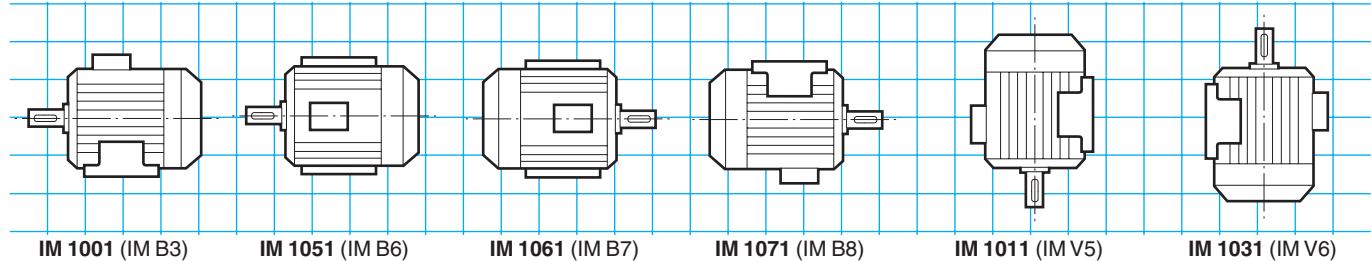

Component	Materials	Remarks
Finned housing	Cast iron	<ul style="list-style-type: none"> - with cast foot (with the exception of frame size 80), or without foot <ul style="list-style-type: none"> • 4, 6 or 8 mounting holes for the foot casings • lifting rings for frame size ≥ 100 - external earth terminal
Stator	Insulated low carbon magnetic steel laminations Enamelled electrolytic copper	<ul style="list-style-type: none"> - the low carbon content guarantees the long term stability of the characteristics - semi-enclosed slots - insulation system class F
Rotor	Insulated low carbon magnetic steel laminations Aluminium (A5L) or copper	<ul style="list-style-type: none"> - squirrel cage with inclined bars - squirrel cage pressure die cast in aluminium (or alloy for special applications) or soldered in copper - key or mounted on the shaft by heat shrinking - dynamically balanced rotor class A - 1/2 key
Shaft	Steel	<ul style="list-style-type: none"> - for frame size ≤ 132 : <ul style="list-style-type: none"> • tapped shaft end • closed keyway - for frame size ≥ 160 : <ul style="list-style-type: none"> • tapped shaft end • open key
End shields	Cast iron or steel	<ul style="list-style-type: none"> - cast iron for frame size ≤ 280 - steel for frame size ≥ 315
Bearings and lubrication		<ul style="list-style-type: none"> - ZZ types lubricated for life up to 132 - regreasable types from 160 upwards - front bearing locked on frame size 80 - rear preloaded bearings from 90 to 315 ST - from preloaded from 315 M upwards
Labyrinth seals Lipseals	Technopolymer or steel Synthetic rubber	<ul style="list-style-type: none"> - front and rear lipseals for frame sizes up to and including 225 and 280 - front and rear labyrinth seals for frame sizes ≥ 250 (except 280)
Fan	Composite material up to 225 inclusive, metal for larger models	<ul style="list-style-type: none"> - 2 directions of rotation: straight blades
Fan cover	Sheet steel	<ul style="list-style-type: none"> - fitted with a drip cover for operation in vertical position, shaft facing down for frame sizes from 80 to 225. For larger models, at request
Terminal box	Cast iron for frame sizes ≤ 280 Steel for frame sizes ≥ 315	<ul style="list-style-type: none"> - type «d» in standard version - fitted with flameproof cable gland (the cable Ø should be specified when ordering) - can be rotated: 4 positions - internal earth terminal - planchette à bornes ou bornes traversantes

FLSD flameproof totally enclosed three-phase asynchronous motors

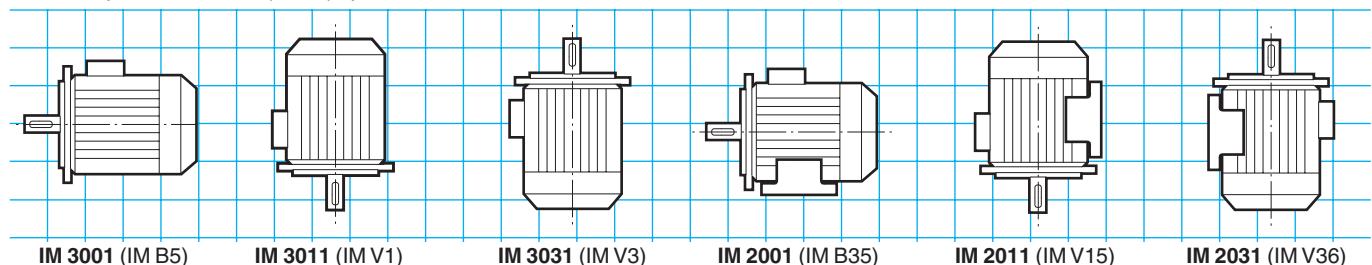

Mounting positions

Foot mounted motors

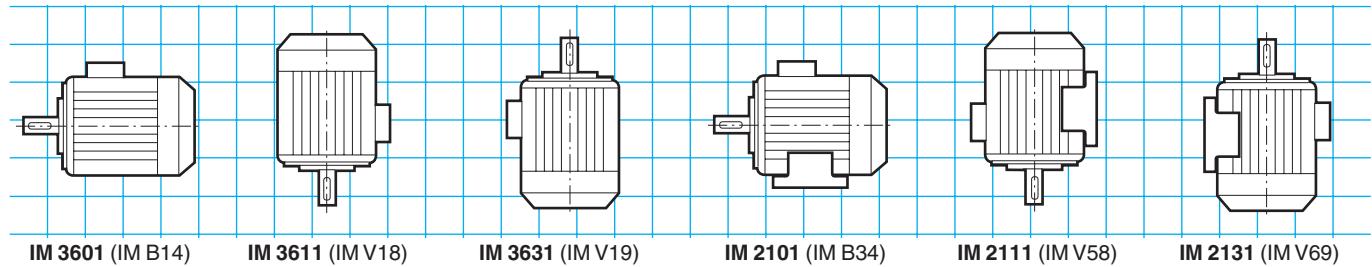

(FF) flange mounted motors with plain holes

- Possible position IM 3001 (IM B5) up to 225 frame size inclusive

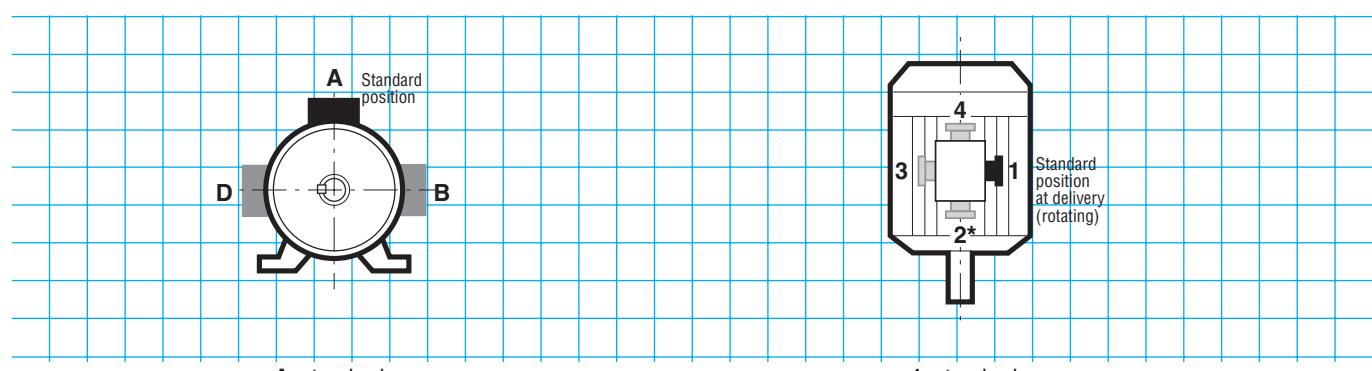

(FT) flange mounted motors with tapped holes

- Possible position up to 132 frame size inclusive

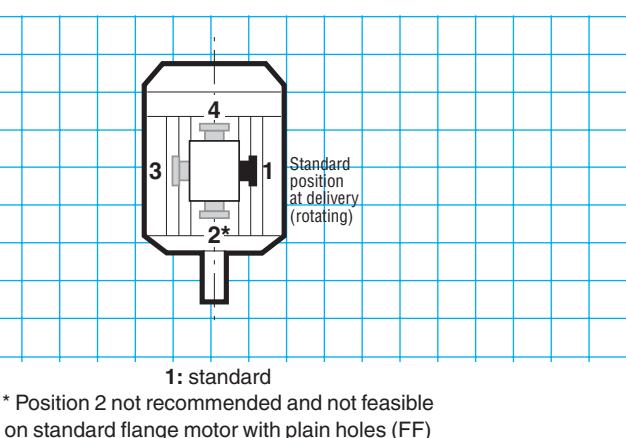

**Positions of the terminal box
in relation to the motor shaft end**

A: standard

**Positions of the cable gland
in relation to the motor shaft end**

1: standard

* Position 2 not recommended and not feasible
on standard flange motor with plain holes (FF)

FLSD

flameproof

totally enclosed three-phase asynchronous motors

Adaptation possibilities

Leroy-Somer offers, for use with the FLSD flameproof motors, many options which meet the needs of highly diverse applications. They are described below and in the chapters relating to gearboxes and to speed variation.

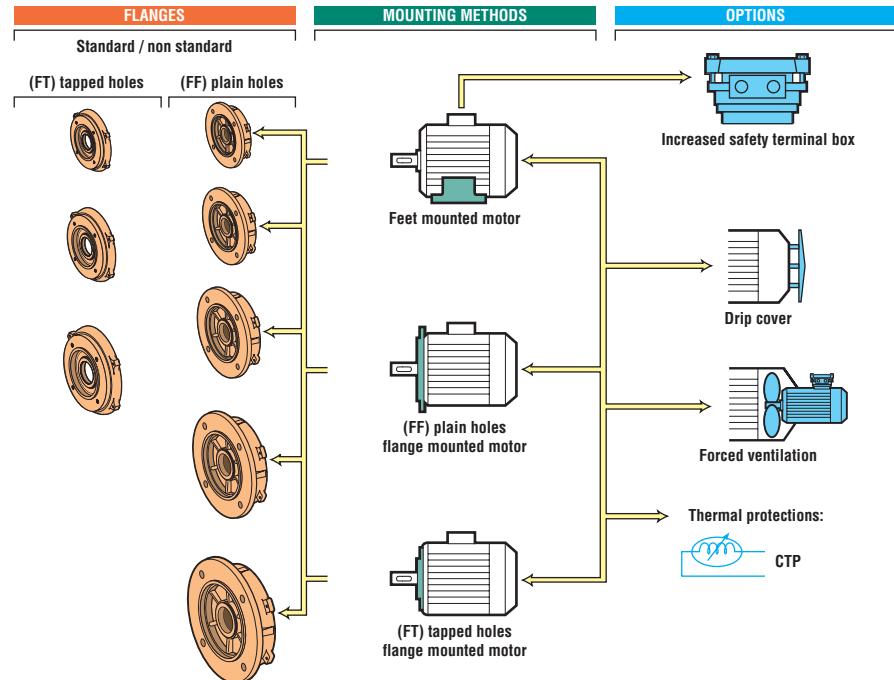

For other variants or any special adaptation, consult the technical specialists at Leroy-Somer.

The FLSD motors may be associated to:

- gearboxes with universal mounting
- electronic variable speed drives: in this application, thermal protection must be included in the winding (and in the bearings from frame size 160 upwards).

The options:

- drip cover
- forced ventilation for frame sizes ≥ 160
- thermal protection
- «e» increased safety terminals box
- direct output by cable
- output by cables
- Encoder
- Cable glands with different dimensions
- Second shaft end
- Roller bearings
- Anti-condensation heaters
- Corrosive atmosphere finish

2. T5 and T6 on request

Codification example:

FLSD flameproof motor 1500 min⁻¹, 3kW
IM 1001, 230/400 V Ex d II B T4

Designation	Code
4P FLSD 100 L 3 kW	
IM B3 230/400 V	XD4 30 201
50 Hz IP 55 ADE 1F	
Ø 8.5 to 16, Ex d II B T4	

The table above is an example.

It allows the creation of the designation for the required product.

This designation corresponds to a product code.

The product codes that are present in the selection grids can be used directly.

They simplify the ordering process.

The codification table is incorporated in the price list with the designations list.

FLSD

flameproof

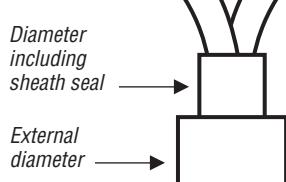

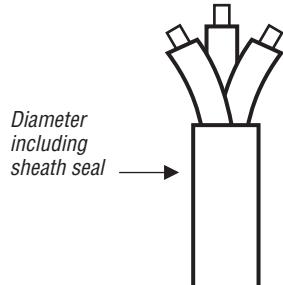

totally enclosed three-phase asynchronous motors

Selection

Main supply cables

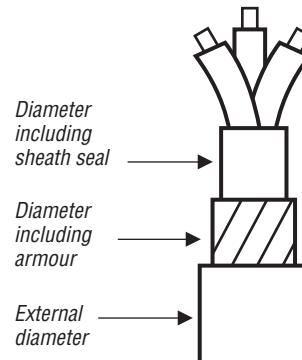

Non-armoured cables

(associated with ADE 1F type cable glands)

Armoured cables

(associated with ADE 4F type cable glands)

The sealed sheath diameter of the power supply cable is compressed by the certified cable gland ring, thus creating the flameproof seal. Anchoring generally affects the cable external diameter.

The sealed sheath diameter must absolutely correspond to a permissible diameter for the cable glands.
THIS CONDITION IS ESSENTIAL IN ORDER TO MAINTAIN THE FLAMEPROOF CHARACTER OF THE MOTOR.

Number and size of the standard cable glands for "d"

The following table indicates, for standard boxes:

- the cable glands normally provided
- maximum size cable glands may be provided for connection of only one cable
- maximum size cable glands may be provided for connection of two cables

Terminal box for frame size	Standard cable glands		Maximum size for 1 cable gland		Maximum size for 2 cable glands

FF flange mounted motors, in position IM 3001 (IM B5), are only available up to frame size 225. Thereafter, consult us. See page A6.2 for mounting possibilities.

*. LA = 22 from frame size 280 upwards.

** = holes oriented at 22°30 in relation to the vertical.
