

LG150 Sealant Tape

■ Product description

LG150 is a low/medium temperature sealant tape used for vacuum bag compaction. LG150 is successfully used in industries like Wind Energy and Marine for infusion process. It could be also used in other industries for room temperature debulking cycles and low temperature/low pressure curing cycles.

LG150 exhibits good adhesion (tack) properties and stick easily to both bagging film and tool facilitating vacuum bag compaction and reducing risk of leaks and the waste of time in finding them.

Material is compatible with most laminate (including composites tools) and film materials.

For optimum results, tape must be allowed to cool till ambient temperature before stripping from mold surface.

■ PROPERTIES

Maximum Use Temperature	302°F (150°C)
Colour	Black
Solids	100%
Flammability	Non flammable

■ AVAILABILITY&PACKAGING

Standard Size	12mm*3mm*15m (1/2"x.125"x50') (4mm on request)
Standard Box Contents	20Rolls
Also Available In Cord	24Boxes In One Pallet

■ Notes

Storage: In original packaging at temperature between 5°C --25°C

Shelf life: 12months

LG150 is non toxic, non irritant, and non injurious to skin
