

Intrinsically Safe Explosion-proof System

5 Port Solenoid Valve

Compliant to International Standard (IEC 79)

The 51-SY series (system which combines a pilot valve and SMC specific barrier (safety retainer)) is certified to have explosion-proof performance of ExiaII BT4, which is compliant with the "New Technical Standard" which was established based on the international standard (IEC 79).

Series 51-SY5000/7000/9000

SMC
CAT.ES11-90B

Compact, High Flow

6	600 mm	Maximum length for L-type
10	1000 mm	—
15	1500 mm	—
20	2000 mm	—
30	3000 mm	—
100	10000 mm	Semi-standard

Specifications

Series		51-SY5000	51-SY7000	51-SY9000
Fluid		Air		
Internal pilot operating pressure range (MPa)	2-position single	0.15 to 0.7		
	2-position double	0.1 to 0.7		
	3-position	0.2 to 0.7		
Ambient and fluid temperature (°C)		-10 to 50 (No freezing)		
Max. operating frequency (Hz)	2-position single, double	5		
	3-position	3		
Manual override (Manual operation)		Non-locking push type, Push-turn locking slotted type, Push-turn locking lever type		
Pilot exhaust method		Main/Pilot valve common exhaust		
Lubrication		Not required		
Mounting orientation		Unrestricted		
Impact/Vibration resistance (m/s ²) ^{Note)}		150/30		
Enclosure		IP30 (L-type), IP40 (LL-type), IP65 (TT-type)		

* Based on IEC60529

Note) Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Solenoid Specifications

Electrical entry	L-type plug connector (L), L-type plug connector with cover (LL), Terminal type (TT)
Coil rated voltage	12 VDC
Allowable voltage fluctuation	-10% to +10% of rated voltage
Coil insulation type	Class B
Power consumption	0.52 W (at rated voltage)

Intrinsically Safe Explosion-proof System Specifications

Type of explosion-proof structure	Intrinsically safe explosion-proof structure (ia) ^{Note 1)}
Applicable gas or ignition temperature of steam and explosion class	IIBT4
Voltage to barrier	24 VDC (rated voltage of system) ^{Note 2) Note 3)}
Tolerant voltage fluctuation	Refer to the barrier dimensions on page 41 and 42.

Note 1) **Warning** Can not be used in a class-0 environment. Use in a class-2 or class-1 environment.

Note 2) **Caution** The valve and barrier have polarity. If voltage is supplied with wrong polarity, the barrier can not be used.

Note 3) **Caution** Voltage to the valve should be 10.8 VDC (minimum value).

Response Time

Note) Based on dynamic performance test, JIS B 8375-1981. (Coil temperature: 20°C, system A, B at 24 VDC)

Type of actuation	Response time (ms) (at 0.5 MPa) ^{Note)}		
	51-SY5000	51-SY7000	51-SY9000
2-position single	26 or less	38 or less	50 or less
2-position double	22 or less	30 or less	50 or less
3-position	38 or less	56 or less	—

Note) Response time becomes longer by 17 ms for system D (at ON state).

(This figure shows a closed center type.)

Component Parts

No.	Description	Material	Note
1	Body	Aluminum die-casted	White
2	Adapter plate	Resin	White (51-SY9000: Gray)
3	End plate	Resin	White
4	Piston	Resin	—
5	Spool valve assembly	Aluminum, HNBR	—

Replacement Parts

No.	Description	Part no.
6	Port block assembly	Refer to "How to Order Port Block Assembly" on page 5.

Bracket Assembly Part No.

Description	Part no.
Bracket (for F1)	SX ⁵ 000-16-2A (with mounting screw)
Bracket (for F2)	SX ⁵ 000-16-1A (with mounting screw)

* The 51-SY9000 has no bracket.

How to Change Port Block Assembly

If using body ported type, both A and B port sizes can be changed by replacing the port block assembly mounted on the body. When changing this block assembly, the correct screw torque must be achieved to avoid possible air leakage.

Caution

Mounting screw tightening torques

51-SY⁵000 (M3): 0.6 N·m
51-SY9000 (M4): 1.4 N·m

* Refer to "How to Order Port Block Assembly" on page 5 for part number.

	3-position		0.25 to 0.7		
Ambient and fluid temperature (°C)			-10 to 50 (No freezing)		
Max. operating frequency (Hz)		2-position single, double	5		
		3-position	3		
Manual override (Manual operation)			Non-locking push type, Push-turn locking slotted type, Push-turn locking lever type		
Pilot exhaust method		Internal pilot	Main/Pilot valve common exhaust		
		External pilot	Pilot valve individual exhaust		
Lubrication			Not required		
Mounting orientation			Unrestricted		
Impact/Vibration resistance (m/s ²) ^{Note)}			150/30		
Enclosure			IP30 (L-type), IP40 (LL-type), IP65 (TT-type)		

* Based on IEC60529

Note) Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Solenoid Specifications

Electrical entry	L-type plug connector (L), L-type plug connector with cover (LL), Terminal type (TT)
Coil rated voltage	12 VDC
Allowable voltage fluctuation	-10% to +10% of rated voltage
Coil insulation type	Class B
Power consumption	0.52 W (at rated voltage)

Intrinsically Safe Explosion-proof System Specifications

Type of explosion-proof structure	Intrinsically safe explosion-proof structure (ia) ^{Note 1)}
Applicable gas or ignition temperature of steam and explosion class	IIBT4
Voltage to barrier	24 VDC (rated voltage of system) ^{Note 2) Note 3)}
Tolerant voltage fluctuation	Refer to the barrier dimensions on page 41 and 42.

Note 1) **Warning** Can not be used in a class-0 environment. Use in a class-2 or class-1 environment.

Note 2) **Caution** The valve and barrier have polarity. If voltage is supplied with wrong polarity, the barrier can not be used.

Note 3) **Caution** Voltage to the valve should be 10.8 VDC (minimum value).

Response Time

Note) Based on dynamic performance test, JIS B 8375-1981.
(Coil temperature: 20°C, system A, B at 24 VDC)

Type of actuation	Response time (ms) (at 0.5 MPa) ^{Note)}		
	51-SY5000	51-SY7000	51-SY9000
2-position single	26 or less	38 or less	50 or less
2-position double	22 or less	30 or less	50 or less
3-position	38 or less	56 or less	—

Note) Response time becomes longer by 17 ms for system D (at ON state).

Intrinsically Safe Explosion-proof System

5 Port Solenoid Valve

Series **51-SY5000/7000**

Body Ported Manifold

Bar Stock Type

Type **20**

How to Order Manifold

How to Order Valve Manifold Assembly

Example

51-SS5Y5-20-05 1 set (Type 20, 5 station manifold base part no.)
 * SY5000-26-20A 1 set (Blanking plate assembly part no.)
 * 51-SY5120-ALL3-01 2 sets (Single solenoid part no., barrier is attached)
 * 51-SY5220-ALL3-01 2 sets (Double solenoid part no., barrier is attached)

→ The asterisk denotes the symbol for assembly.
 Prefix it to the part nos. of the solenoid valve, etc.

Add the valve and option part number under the manifold base part number.
 In the case of complex arrangement, specify them on the manifold specification sheet.

Manifold Options

■ Type 20 Blanking Plate Assembly

Series	Assembly part no.
51-SY5000	SY5000-26-20A
51-SY7000	SY7000-26-22A

■ Gasket Assembly Part No.

Series	Gasket assembly
51-SY5000	SY5000-GS-1
51-SY7000	SY7000-GS-1

Note) Gasket assembly consists of 10 sets of mounting screws and a gasket.

■ Individual SUP Spacer Assembly

Series	Assembly part no.	Port size	t
51-SY5000	SY5000-38-1*A	1/8	15
51-SY7000	SY7000-38-1*A	1/4	18

Note) The SUP port of the 51-SY5000/7000 may be either on the lead wire side or on the end plate side. (An assembly is shipped under the conditions shown in the figure.)

■ Individual EXH Spacer Assembly

Series	Assembly part no.	Port size	t
51-SY5000	SY5000-39-1*A	1/8	15
51-SY7000	SY7000-39-1*A	1/4	18

■ Individual SUP Spacer Assembly + Individual EXH Spacer Assembly (Double spacer)

Series	Individual SUP + Individual EXH assembly part no.	Port size	Applicable manifold type
51-SY5000	SY5000-75-2*A	1/8	Type 20
51-SY7000	SY7000-73-3*A	1/4	

Note) The SUP spacer's port does not have an orientation. As for the EXH ports, adjust the symbol "5" to the pilot valve side. Also, please make sure to connect the individual ports to protect the wiring section of the pilot valve from drainage, etc. The individual SUP spacer and EXH spacer can be mounted either on the upper side or lower side. (The above illustration shows the condition when the product is shipped out from a factory already assembled.)

Series 51-SY5000/7000

Manifold Options

■ Type 41, 42 Blanking Plate Assembly

Series	Assembly part no.
51-SY5000	SY5000-26-20A
51-SY7000	SY7000-26-22A

■ Gasket Assembly Part No.

Series	Gasket assembly
51-SY5000	SY5000-GS-2
51-SY7000	SY7000-GS-2

Note) Gasket assembly consists of 10 sets of mounting screws and a gasket.

■ Individual SUP Spacer Assembly

Series	Assembly part no.	Port size	t
51-SY5000	SY5000-38-16*A	1/8	15
51-SY7000	SY7000-38-16*A	1/4	18

Note) The SUP port of the 51-SY5000/7000 may be either on the lead wire side or on the end plate side. (An assembly is shipped under the conditions shown in the figure.)

■ Individual EXH Spacer Assembly

Series	Assembly part no.	Port size	t
51-SY5000	SY5000-39-16*A	1/8	15
51-SY7000	SY7000-39-16*A	1/4	18

■ Individual SUP Spacer Assembly + Individual EXH Spacer Assembly (Double spacer)

Series	Individual SUP + Individual EXH assembly part no.	Port size
51-SY5000	SY5000-75-1*A	1/8
51-SY7000	SY7000-73-1*A	1/4

Note) The port on a spacer can be directed to the pilot valve side or end plate side. For mounting the port to the pilot valve side, please make sure to connect the ports to protect the pilot valve wiring section from drainage.
The individual SUP spacer and EXH spacer can be mounted either on the upper side or lower side. (The above illustration shows the condition when the product is shipped out from a factory already assembled.)

⚠ Caution

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.

ISO 4413: Hydraulic fluid power – General rules relating to systems.

IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.

etc.

Caution: **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

Warning: **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

Danger : **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.

2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.

3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.

2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.

3. An application which could have negative effects on people, property, or animals requiring special safety analysis.

4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Safety Instructions

Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.

If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements". Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered.*2)

Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.

2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.

This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.

3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.

2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Series 51-SY5000/7000/9000 Specific Product Precautions 1

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Manual Override

Warning

■ Non-locking push type [Standard]

Press in the direction of the arrow.

■ Push-turn locking slotted type [Type D]

While pressing, turn in the direction of the arrow.

If it is not turned, it can be operated the same way as the non-locking type.

Caution

When operating the locking type D with a screwdriver, turn it gently using a watchmaker's screwdriver.
[Torque: Less than 0.1 N·m]

■ Push-turn locking lever type [Type E]

While pressing, turn it the direction of the arrow.

If it is not turned, it can be operated the same way as the non-locking type.

Caution

When locking the manual override on the push-turn locking types (D, E), be sure to push it down before turning. Turning without first pushing it down can cause damage to the manual override and trouble such as air leakage, etc.

Exhaust Side

Caution

The 51-SY series pilot valve and main valve share a common exhaust inside the valve. Therefore, do not block the exhaust port when arranging the piping.

Series 51-SY5000/7000/9000 Used as a 3-Port Valve

Caution

In case of using a 5-port valve as a 3-port valve

The 51-SY5000/7000/9000 series can be used as normally closed (N.C.) or normally open (N.O.) 3-port port valves by closing one of the cylinder ports (A or B) with a plug. However, they should be used with the exhaust ports kept open.

Plug position		B port	A port
Type of actuation		N.C.	N.O.
Number of solenoids	Single		
	Double		

How to Use Plug Connector

Caution

1. Attaching and detaching connectors

- To attach a connector, hold the lever and connector unit between your fingers and insert straight onto the pins of the solenoid valve so that the lever's pawl is pushed into the groove and locks.
- To detach a connector, remove the pawl from the groove by pushing the lever downward with your thumb, and pull the connector straight out.

Series 51-SY5000/7000/9000

Specific Product Precautions 2

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Interface Regulator

Caution

Specifications

Interface regulator model		ARBY5000-□-P-2	ARBY5000-□- ^{A1} _{B1} -2		ARBY7000-□-P-2	ARBY7000-□- ^{A1} _{B1} -2
Applicable solenoid valve model		51-SY5□40(R)				51-SY7□40(R)
Regulated port		P	A	B	P	A B
Set pressure range		0.1 to 0.7 MPa				
Maximum operating pressure		0.7 MPa				
Fluid		Air				
Ambient and fluid temperature		Max. 50°C				
Pressure gauge connection port		M5 x 0.8				
Mass	With pressure gauge	66.8 g			110.8 g	
	With plug	60.4 g			103.2 g	
Effective area on supply side Note 3)	P→A, B	—	7.61 mm ²		—	13.54 mm ²
Effective area on exhaust side Note 3)	A, B→EA, EB	11.1 mm ²	10.1 mm ²		15.71 mm ²	15.71 mm ²

Note 1) Pressurize the interface regulator from P port on the base.

Note 2) With closed center and pressure center valves, the pressure can be regulated through P port only.

Note 3) Effective area, excluding the regulated port, when an inlet pressure of 0.5 MPa is supplied with regulators mounted on the solenoid valves (2-position) and sub-plate. Refer to "Flow-rate Characteristics" regarding the regulated port.

Note 4) Valves for mass include gasket and mounting screws.

Note 5) With A, B ports regulated (P controlled A, B regulated), the effective area (Cv factor) for the regulated port and unregulated passage (P→B or P→A) decreases as shown in the graph below when the set pressure is 0.25 MPa or less.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

One-touch Fittings

Warning

1. Please take antistatic precautions appropriate to the use of resin tubing.

Refer to "Recommended Practices for Explosion-Protected Electrical Installations in General Industries" issued by Technology Institution of Industrial Safety.

Caution

The pitch determined for each of the 51-SY series piping ports (P, A, B, etc.) is based on the assumption that KJ series one-touch fittings will be used.

For this reason, other pipe fittings may interfere with each other depending on their type and size. Dimensions should be confirmed in a pipe fitting catalog before they are used.

• Tubing attachment/detachment for one-touch fittings

1) Attaching of tubing

1. Take a tubing having no flaws on its periphery and cut it off at a right angle. When cutting the tubing, use tubing cutters TK-1, 2 or 3. Do not use pinchers, nippers or scissors, etc. If cutting is done with tools other than tubing cutters, the tubing may be cut diagonally or become flattened, etc., making a secure installation impossible, and causing problems such as the tubing pulling out after installation or air leakage. Allow some extra length in the tubing.
2. Grasp the tubing and push it in slowly, inserting it securely all the way into the fitting.
3. After inserting the tubing, pull on it lightly to confirm that it will not come out. If it is not installed securely all the way into the fitting, this can cause problems such as air leakage or the tubing pulling out.

2) Detaching of tubing

1. Push in the release button sufficiently, pushing its collar equally around the circumference.
 2. Pull out the tubing while holding down the release button so that it does not come out. If the release button is not pressed down sufficiently, there will be increased bite on the tubing and it will become more difficult to pull it out.
 3. When the removed tubing is to be used again, cut off the portion which has been chewed before reusing it. If the chewed portion of the tubing is used as is, this can cause trouble such as air leakage or difficulty in removing the tubing.
- The pitch determined for each of the 51-SY series piping ports (A, B, etc.) is based on the assumption that KJ series one-touch fittings will be used. For this reason, other pipe fittings may interfere with each other depending on their type and size. Dimensions should be confirmed in a pipe fitting catalog before they are used.

Other Tubing Brands

Caution

1. When using other than SMC brand tubing, confirm that the following specifications are satisfied with respect to the outside diameter tolerance of the tubing.

- | | |
|------------------------|---|
| 1) Nylon tubing | within ± 0.1 mm |
| 2) Soft nylon tubing | within ± 0.1 mm |
| 3) Polyurethane tubing | within $+0.15$ mm,
within -0.2 mm. |

Do not use tubing which do not meet these outside diameter tolerances. It may not be possible to connect them, or they may cause other trouble, such as air leakage or the tubing pulling out after connection.

Solenoid Valve Mounting

Caution

Mount it so that there is no slippage or deformation in gaskets, and tighten with the tightening torque as shown below.

Model	Thread size	Tightening torque
51-SY5000	M3	0.8 N·m
51-SY7000	M4	1.4 N·m
51-SY9000	M3	0.8 N·m

Series 51-SY5000/7000/9000

Specific Product Precautions 5

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Valve Selection for Hazardous Environment

Warning

The explosion-proof performance of the 51-SY (intrinsically safe explosion-proof system) is ExiaII BT4 (See the reference "Explosion-proof Structure Symbol (ExiaII BT4)"). Selection of a valve for a dangerous place should be done in accordance with "Recommended Practices for Explosion-Protected Electrical Installations in General Industries" issued by Technology Institution of Industrial Safety.

Classification of Hazardous Environment

Warning

This valve should be used in a class-1 or class-2 environment by combining with a barrier (placed in non-hazardous location).

Note that this valve can not be used in a class-0 environment.

Classification of hazardous environment

■ Class-0 environment Not available

A place where an explosive atmosphere is constantly generated or can be generated.

Also, a place where atmosphere is above the lower limit of explosion constantly or for a long time of period is also regarded as the class-0 environment for safety season.

(Places often falling into the class-0 environment)

- a) A container of flammable liquid or space above the liquid level in the container.
- b) Around the liquid level of flammable liquid in an open container or similar place.

■ Class-1 environment Available

A place where an explosive atmosphere can be generated periodically or occasionally.

Also, a place which can have a dangerous concentration of explosive gas due to repair, maintenance, or leakage.

(Places often falling into the class-1 environment)

- a) Around an opening which releases explosive gas due to removal of a product during normal operation, opening/closing of a lid, or operation of a safety valve.
- b) Around the opening of a container such as a tanker and drum which is filled with flammable liquid.
- c) Around an opening which releases explosive gas due to occasional operation of a relief valve.
- d) Around the opening of a gas-vent on a tank etc.
- e) Around an opening which releases explosive gas during inspection or repair work.
- f) A room or a place which can have explosive gas due to insufficient ventilation.
- g) The part which is above the roof of a floating roof tank but within the shell.
- h) A place which can have leaked explosive gas and can accumulate the gas such as a pit.

■ Class-2 environment Available

A place where explosive atmosphere can be generated under abnormal condition though an explosive atmosphere cannot be generated under normal condition.

- 1) A place where flammable gas is constantly operated, but it is enclosed in an air-tight container or facility, and concentration of the gas may be thick when the container or facility gets broken due to an accident or when operation fails.
- 2) A place that can have a dangerous explosive gas concentration due to the breakage of mechanical ventilation equipment though the equipment is usually reliable.

(Places often falling into the class-2 environment)

- a) A place where dangerous gas or liquid can leak from a container if the container is corroded.
- b) A place where dangerous gas or liquid can be released or leak out due to incorrect operation of equipment or an abnormal reaction of equipment after exposure to high temperature and high pressure.
- c) A place where a dangerous atmosphere is generated due to failure of mandatory ventilation equipment and stagnation of explosive gas.
- d) A place which is indoors around or next to the class-1 environment and rarely has explosive gas with dangerous concentration.

Prohibition of Disassembly and Modification

Warning

Disassembling the pilot valve and barrier can deteriorate the explosion-proof performance, and it may lead to an accident.

Therefore, please do not disassemble or modify the pilot valve and barrier.

Intrinsically Safe Explosion-proof Circuit Wiring

Warning

Wiring of intrinsically safe explosion-proof circuits should not be routed with the other circuits. Also, it should not have electrostatic induction or electromagnetic induction.

Series 51-SY5000/7000/9000

Specific Product Precautions 6

Be sure to read before handling.

Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for 3/4/5 Port Solenoid Valves Precautions.

Reference

Explosion-proof Structure Symbol (ExiaIIBT4)

Symbols Specified by Technical Standard

(1) Groups of explosion-proof equipment

Explosion-proof equipment is classified into two groups depending on the place where electric equipment is used.

Group I: Electric equipment which is used in a dangerous environment within a tunnel or mine

Group II: Electric equipment which is used in a dangerous environment within a factory or office.

SMC valve belongs to Group II.

(2) Classification of gas

Classification of gas corresponds to the explosion class of gas specified in the conventional standard, and there are three classes, A, B, and C, depending on the characteristics of explosive gas. The classification of gas specifies the dangerous degree as C>B>A. SMC valve is applicable to the gases classified into A and B.

(3) Temperature class

Temperature class corresponds to the ignition degree of gas specified in the conventional standard, and there are six classes, T1 to T6. T1 is the least dangerous gas which has the highest ignition temperature, and T6 is the most dangerous gas which has the lowest ignition temperature. SMC valve is applicable to T1 to T4 temperature classes.
