

## VI200E Flow Mesh

### ■ Product description

VI200E is a 200g/m<sup>2</sup> PE diamond point shape extruded infusion mesh. This media is commonly used to infuse all size of parts in Wind energy and Marine Markets.

VI200E is used to allow resin feeding and spreading over the component. The PE material is compatible with all kinds of resin, polyester, vinylester and epoxy with the maximum use temperature 120°C ( 248 °F ) .

### ■ PROPERTIES

Maximum Cure Temperature	248 °F ( 120°C )
Material	PE
Solid State	100%
Fabric Weight	200g/m <sup>2</sup>
Thickness	1.3mm ± 0.2mm (0.051 ± 0.008")
Colour	Dark Green

### ■ AVAILABILITY&PACKAGING

Standard Size	1.2m*50m(48"x55yard)
Packaging	Polyester Bag

Other size on request

### ■ Notes

Store in cool, dry place, and avoid direct sunlight

No skin irritation problems

No other special requirement.
