

*...the tougher the job  
-the more **TwinSaw***

Bad Reichenhall 2006

Transrapid 2006

Tanklastzug Heilbronn 2008

car side crash protection

**Improvements consequently realized**

(Technical changes reserved)

completely new constructed, due to the customer requirements

New gearing with bottom-extended housing for more cutting depth

Motor, motor housing and air flow optimized

hand grip, electronic board, security device improved

**Partnerproduct - Made in Germany:**

With this new model CRE 2326 TwinSaw and its partner Eibenstock Elektrowerkzeuge have achieved all their professional targets:

- new patented gear construction with extremely high liability
- substitution of the electronic power regulation by top modern gear construction for longlasting cuts
- less: 200mm length, 60mm width, 40mm height
- most important: 2 kg less weight
- 2-point-stabalization of the front pump device
- 90 mm cutting depth with dia. 260 mm blades
- and much, much more...
