

www.svt-gmbh.com

Well-considered from the beginning to the end we develop complete solutions that are as individual and high quality as the goods you need to transfer. To convince competently, each individual service optimizes the overall package.

Our excellent service and execution includes:

- First choice for a safe, reliable and economic loading and unloading of liquids and gases
- Individual solutions based on a simple, clear and intelligent idea
- Construction in accordance with international standards enables to guarantee the highest level of safety and functionality
- Extremely fast installation and commissioning of SVT Loading Arms due to assembled delivery
- Comprehensive and competent service for the entire life time of our loading systems
- Original spare parts and original service also for loading systems of the former Connex GmbH and Wiese GmbH

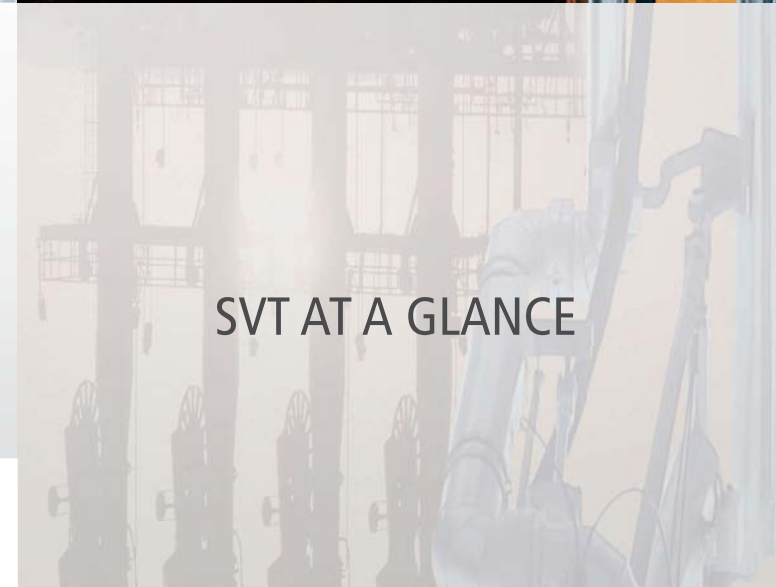

As a member of the GESCO group, SVT GmbH is one of the leading global manufacturers of loading equipment for liquid and gaseous products. SVT has more than 40 years of experience in the design, construction, and production of loading arms. Worldwide installations of loading systems also add to SVT's reputation as a reliable and innovative partner for its clients.

Still today, SVT manufactures and assembles all of its key components exclusively in Germany. Swivel Joints, Emergency Release Couplers, Control Systems, Quick Connect/Disconnect Couplers, among others, are developed, produced, and tested by SVT. This is German engineering at its

best. More than 180 loading arms sold to a single customer is convincing proof of our strong belief in quality.

Regional salespeople as well as the right international contact ensure excellent service and extremely rapid response times. A team of highly qualified technicians and engineers set up, test and maintain all of SVT's installations.

Furthermore, SVT is the only company worldwide that is in possession of the technical drawings and know-how of the former Wiese GmbH and Connex GmbH.

SVT AT A GLANCE

We transfer true values.
