Nashville, TN

CUSTOM WIRE & CABLE SERVICES

EDMO Distributors, Inc. is committed to streamlining the wire and cable purchasing process by anticipating our customers' needs and being ready with solutions. We provide a variety of wire sizes in a range of continuous lengths, meaning that you'll never get a spliced wire in the middle of the roll when you order from us. We also supply wire in 100-foot lengths, which is perfect for resale or jobs requiring unusual wire that would be impractical to inventory. And of course, larger quantities are often available at a discount.

EDMO's in-house, custom spools have a core of 3.5 inches or larger to prevent kinking and if you need a different spool with a larger hole or core, we'll find it. When it comes to laser wire marking, EDMO has you covered. We provide complete laser wire marking services and can accommodate your specifications. You can order laser-marked wire on our website at edmo.com.

All of our wire and cable is sourced carefully, ensuring complete traceability. Every spool we ship is stretch-wrapped to prevent shifting on the spool and subsequent tangling. For more information, you can check out all of our spool lengths online at edmo.com or speak to a member of our friendly sales team and they can help you to select the best product for your job and shop setup.

ETHERNET & COAX CABLE

We source best-in-class coaxial and data ethernet cable. EDMO's assortment includes coaxial and high-speed ethernet cable with options that meet military, ARINC, and FAA specifications.
